

# Eliminate *SHAKY* Test Results

Vibrations around sensitive lab equipment can result in several negative outcomes:

- INCORRECT DATA caused from vibration interference can result in costly quality issue nightmares.
- INCORRECT DATA caused from vibration interference may result in false diagnosis of medical problems
- VIBRATIONS from surrounding equipment can even wear down electronic components within sensitive equipment resulting in costly repairs or early replacement.

The LP-13 Shake Absorber® vibration isolation pad has solved many such problems in labs around the world. From labs in universities to medical research facilities and quality control labs, Kellett Enterprises, Inc. has improved accuracy and prevented equipment failure from vibration interference.

The long lasting, cost effective material can isolate a large range of frequency vibrations from surrounding environments. From the lightest weight to the heaviest weight lab equipment, we have the pad to fit your needs.

Give us a call -or- standard sizes are available on line [www.kellettent.com](http://www.kellettent.com)

Eliminate those “shaky” test results and keep your job off of “shaky ground!”
